Shravani Tingare

Frontend Developer Intern @ SaniSoft InfoTech
shravanitingare333@gmail.com — linkedin.com/in/shravanitingare — github.com/Shravani-std

SKILLS

Programming Languages: Python, SQL
Web Technologies: HTML5, CSS, JavaScript, ReactJS,
Machine Learning & Deep Learning: Supervised and Unsupervised Learning, Feature Engineering, Model Evaluation, Hyperparameter Tuning, Recommendation Systems, Anomaly Detection, Artificial Neural Networks (ANN), Convolutional Neural Networks (CNN), Transfer Learning, Optimizers, Loss Functions, NLP, Transformers
Databases: MySQL, Oracle, MongoDB, MS SQL Server
Libraries: NumPy, Pandas, Scikit-learn, TensorFlow, Keras, PyTorch, Flask, Matplotlib, FastAPI
Tools & Platforms: Git, GitHub, Docker, Postman, Google Colab, Jupyter Notebook
Coursework: OOP, Data Structures, Databases, Operating Systems, RAG Systems

EXPERIENCE

SaniSoft InfoTech *Nov 2024 – Mar 2025*
Frontend Developer Intern
- Built an Entrance Exam Platform with student registration and admin panels.
- Developed an Academic Management System with profiles, attendance, and task tracking using ReactJS.
- Responsibilities included requirement gathering, frontend development, database design, and API integration.
- **Tech Stack:** ReactJS, Tailwind, MS SQL Server

PROJECTS

NIRF Ranking Recommendation System *Python, Scikit-learn, XGBoost, Pandas, Matplotlib*
- Developed a machine learning recommendation system to identify gaps in institutional NIRF rankings.
- Applied cosine similarity and XGBoost models for ranking prediction and recommendation generation.
- Performed data preprocessing, feature engineering, and model evaluation.
- Visualized feature importance and ranking insights for actionable recommendations.

Payment Fraud Detection System *Python, XGBoost, Isolation Forest, Machine Learning*
- Developed a real-time fraud detection system to classify financial transactions as normal, suspicious, or fraudulent.
- Implemented Isolation Forest, Random Forest, and XGBoost models for anomaly detection and risk scoring.
- Engineered transaction-based features including amount, merchant category, location, frequency, and device information.
- Improved fraud detection accuracy while minimizing false positives through model optimization.

Document Tampering Detection System *CNN, ResNet50, EfficientNet, Computer Vision*
- Developed a deep learning-based system to detect tampered identity documents such as PAN cards and Aadhaar cards.
- Trained ResNet50 and EfficientNet models for binary classification of authentic versus manipulated documents.
- Identified image edits, content modifications, and digitally altered regions using visual forensic techniques.
- Enhanced document authenticity verification for secure KYC and onboarding workflows.

EDUCATION

B.Tech in Computer Science and Engineering *Graduated(2022-2026)*
Dattajirao Kadam Technical Education Society, Ichalkaranji
CGPA: 8.02 / 10

HSC (12th) *2022*
Manere High School & Junior College, Ichalkaranji
Grade: 80%

SSC (10th) *2020*
Marathi Medium High School (DKTE Campus), Ichalkaranji
Grade: 92%

EXTRACURRICULAR ACTIVITIES

Interests: Sports, Sketching, Trekking
